From fragmented data to closed-loop execution

Unify trusted data, AI-driven decisions and governed automation in a closed-loop operating model.

THE REALITY OF MODERN IT

Modern IT environments are growing more complex, while data, workflows and decisions remain fragmented across the enterprise. Without a trusted operational foundation, teams struggle to establish context, align actions and confidently scale AI-powered operations.

THE NEW STANDARD

Ivanti Neurons is the trusted operational foundation for modern IT. It unifies asset data, grounds AI in trusted context, and enables governed automation so teams can move from truth to decision to action in a closed-loop system.

THE FIVE-STAGE FLOW

1 Establish trusted data

Active and passive discovery, with cloud and SaaS connectors, continuously surface assets across the IT environment.

2 Create a system of record

Data is normalized, reconciled and connected into a trusted asset record as the basis for operational decisions.

3 Surface what matters

AI-driven insights and exposure context help teams prioritize risk, cost and operational actions with confidence.

4 Act with confidence

Orchestrate governed workflows across ITSM, UEM, CMDB and ITAM so teams can automate action without losing trust or control.

5 Govern every step

Governance applies across data, decisions and automation so outcomes remain trusted, traceable and aligned to policy in a closed loop.

What teams gain

- A trusted operational foundation across IT and security
- Reduced software waste through clearer entitlement and usage visibility
- Faster decisions and reduced exposure windows
- Continuous audit readiness with trusted evidence and traceable actions
- More accurate CMDB and ITSM performance
- Less manual work through automation and more consistent, trusted outcomes across teams

WHERE DATA AUTHORITY BEGINS

Autonomous Endpoint Management accelerates the path to trusted data and a stronger operational foundation.

Explore how that foundation powers the closed-loop system, turning insight into confident decisions and governed action.
