# Ivanti Windows Patch

OEM Alliance Partners

**To drive incremental revenue, Ivanti Windows Patch OEM Alliance Partners integrate Ivanti® patch management technologies as part of a total OEM solution under their own brands. As a result, alliance partners' customers benefit from industry-leading Ivanti technology, shared expertise, and support resources.**

- **Extensive patch management application support** – Includes timely and verified release of patch data feed for Microsoft, Microsoft legacy, and third-party applications.

- **Patch coverage for virtual and physical machines** – Automatically discovers, scans, and remediates physical and virtual machines that are powered on or off.

- **Flexible architecture** – Integrates into agentless and agent-based patch management solutions. Separation of the patch data feed from the patch engine enables the timely release of patch data.He

## Agent Architecture

## Windows Patch SDK Core Features

SDKs include:

- An existing deployment architecture that software vendors can leverage

- Extensive patch support for Microsoft, Microsoft legacy, and third-party applications, including Sun Java, iTunes, QuickTime, Firefox, Skype, RealPlayer, Adobe, Oracle, and more. See the full list (Fix this url)

- Agent-based or agentless patch assessment

- Native or managed interfaces

- XML or binary in/out

- Content team of subject matter experts

## Agentless Architecture

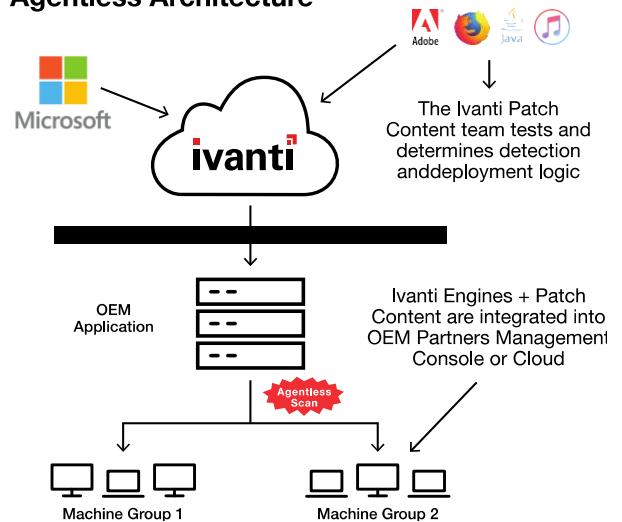

## Windows Patch SDKs Overview

Features and benefits of Ivanti Windows Patch SDKs include:

- **Assessment SDK** – Performs agent-based or agentless patch assessment to find missing and installed patches and service packs.

- **Packaging SDK** – Creates install scripts for patch installation. Outputs URLs for all patches. Input required for packager is generated from assessment results.

- **Utilities SDK** – Deobfuscates Ivanti patch metadata for richer UIs and reporting. Keeps Ivanti patch components and data files up to date.

- **Custom Patch SDK** – Extends the technology to scan for unsupported or custom patches.
