

Speakeasy, powered by Wavelink, is already the fastest way to voice-enable mobile applications. Now, it's even faster!

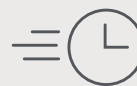

Bi-directional Voice Directed Software

Use text-to-speech and speech-to-text for heads up, eyes forward workflow interactions

Speaking the Language of Productivity

Speakeasy voice-enables your software application in 30 languages

Minimize Worker Training Times

No need to train the voice software. Workers pick up an enabled device, and are up and working in as little as 15 minutes

Designed for Your Enterprise Apps

Simply select your existing host apps in the Rapid tool, and files are generated for your mobile deployment. No changes to your host system

Configure and deploy voice to your mobile applications in less than 15 minutes with Rapid Voice for Speakeasy.

TRY RAPID VOICE
