

# 5 ways to Reduce your SAP License Spend

Follow these five key tips before purchasing additional SAP licenses—you'll spend less, save more, and optimize your licensing for your next SAP contract negotiation or audit.

1

## Combine Users

Combine users between SAP systems to optimize your licensing costs. **Ivanti Optimizer for SAP** helps identify duplicate accounts across all your SAP systems automatically.

2

## Save Now

Remove inactive and dormant users to reallocate licenses to new users immediately. **Ivanti Optimizer for SAP** helps track actual usage of all users across all SAP systems to identify inactive users.

3

## Classify Users

Classify users by actual usage, ensuring you won't ever be under or over-licensed. **Ivanti Optimizer for SAP** helps give you a bird's eye view of all classification types to determine which method optimizes your licenses best.

4

## Be on Alert

Receive notifications when indirect usage is detected and respond quickly and appropriately. **Ivanti Optimizer for SAP** helps identify indirect access to SAP systems and provides automated notifications.

5

## Optimize Your Software Engines

Optimize SAP engines by employing usage data—they're not a fixed expense! **Ivanti Optimizer for SAP** helps illustrate usage data of each engine and engine group to identify trends in engine usage and licensing.
