Ivanti Automation Standard Edition Connectors

Ivanti Automation Standard edition is a free version of Ivanti Automation for all Ivanti customers with a current active maintenance license. It supports the use of five automation connectors for the Ivanti product portfolio: Ivanti Service Manager (Incident), Ivanti Service Manager (Service Request), Ivanti Patch for Windows, Ivanti Security Controls, and Ivanti Endpoint Manager. With Ivanti Automation Standard edition, you have support for an unlimited number of agents and 50+ built-in tasks.

Incident Connector
Create, update and manage incidents from Automation.

Service Request Connector
Create, update and manage service requests from Automation.

Patch for Windows Connector
Create, schedule and manage common tasks within Patch for Windows. Security Controls solutions.

Security Controls Connector
Create, schedule and manage common tasks within Ivanti Security Controls solution.

Appears as a native task in Automation*. No download required. Enables Self-Service user to request software installation on a device.

Endpoint Manager to Service Manager integration requires you contact your Ivanti Sales Representative for special usage license.
