Top IT Trends for the **Everywhere Workplace** IT teams tend to be overworked and undervalued—but in reality, they are an integral

part of achieving an organization's goals. Automation appears to be the next step forward to save IT staff hours and boost productivity. With organizations increasing their levels of IT service automation, are decision-makers seeing the benefits? Pulse and Ivanti surveyed 250 IT and security decision-makers to understand

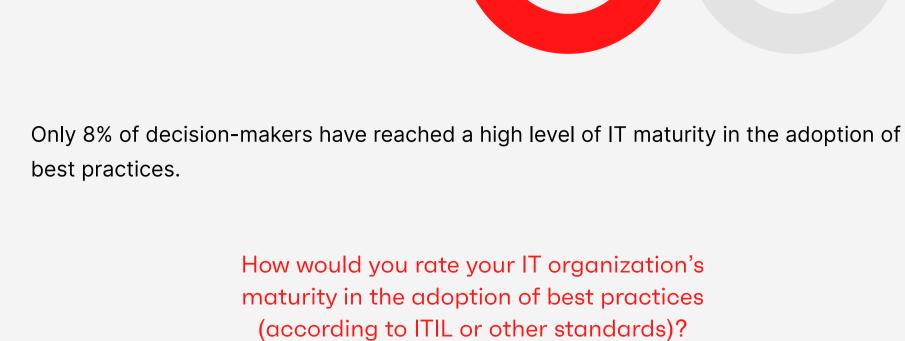

how IT is evolving and what challenges the IT department faces.
