Ivanti Patch Management Portfolio

Ivanti offers a range of patch management products to meet the unique needs of every organization.

Cloud-Native Solutions

Ivanti Neurons for Patch Management

A Cloud-native solution that provides actionable intelligence and device risk visibility across Windows, macOS, Linux and third-party applications to reduce threat exposure and risk. Prioritize and remediate vulnerabilities with insights on active risk exposure, patch reliability and device compliance.

Key Benefits

- Prioritize remediation based on adversarial risk with intelligence on known exploits and threat context for vulnerabilities.

- Save time and avoid failed patch deployments with patch reliability insights from crowdsourced social sentiment data and anonymized deployment data.

- Ensure devices remain in compliance with visibility into devices nearing SLA with the Compliance Reporting dashboard.

- Distribute thoroughly tested patches to thousands of machines in minutes with Autonomous Patch Configurations.

- Allow for multiple parallel deployment tasks such a regular maintenance, priority updates and zero-day response with the deploy by risk feature.

- Out-of-the-box configurability for ring deployment and continuous patch remediation enables streamlined, scalable and proactive vulnerability management across systems.
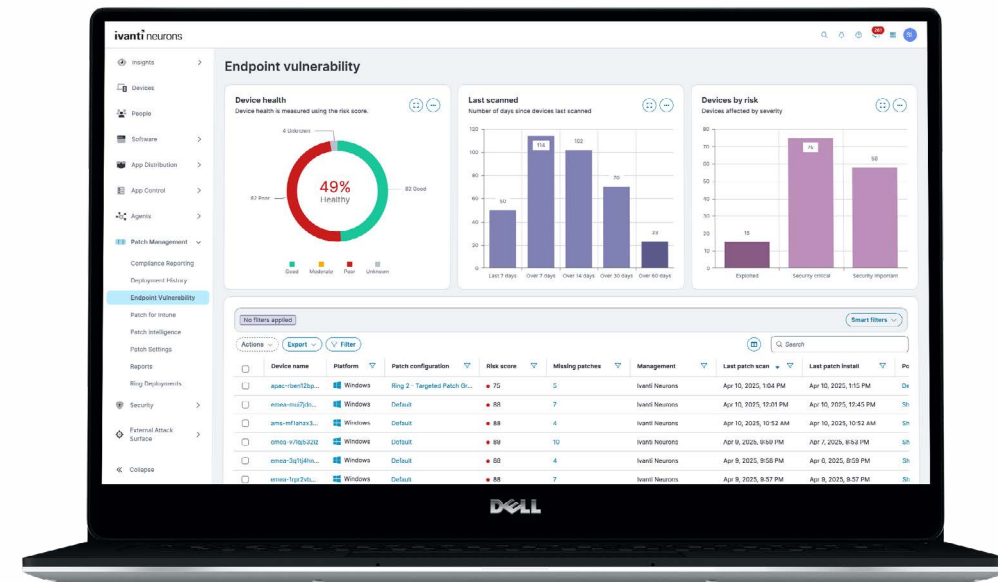

Ivanti Neurons Patch for Intune

Extend existing Microsoft Intune implementations to include third-party application updates with a cloud-native solution that eliminates the need for any additional infrastructure while also providing threat and patch intelligence.

Key Benefits

- Deploy third-party application updates alongside Microsoft OS and application updates within Intune as part of your existing application lifecycle management workflows.
- Prioritize remediation based on adversarial risk with intelligence on known exploits and threat context for vulnerabilities.
- Save time and avoid failed patch deployments with patch reliability insights from crowdsourced social sentiment data and anonymized deployment data.
- Streamline patch management processes by opting to automatically publish third-party updates into Intune as they become available.

On-Premises Solutions

Ivanti Patch for Configuration Manager

Automate the process of discovering and deploying your third-party app patches through the Configuration Manager console with a native plug-in for Configuration Manager that requires no additional infrastructure.

Key Benefits

- Import, manage, sync and deploy all critical patch information using the familiar workflows and features of Configuration Manager and Intune.
- Download patch information and distribute patches for hundreds of applications automatically, including those most often attacked.
- Reduce risk by leveraging years of experience creating and deploying patches and a patching database that leads the industry in extensive pre-download testing.
- Verify patch delivery using Configuration Manager reports and improve visibility with role-based dashboards.

Ivanti Security Controls

Simplify and automate patch management for physical and virtual servers and workstations in the data center with a risk-based solution that includes discovery, OS and application patch management, privilege management and whitelisting.

Key Benefits

- Detect and remediate OS and third-party app vulnerabilities on workstations/servers running Windows or Linux (agent or agentless).
- Discover, inventory and patch physical servers, VMs and templates, regardless of power state or if they are online or off.
- Patch virtual servers, even the offline virtual images, with deep integrations with ESXi.
- Provide authorized access to applications and services without making IT manage extensive lists manually and without constraining users.
- Implement Just Enough Administration and Just-in-Time Administration to take back admin rights but still enable users to do what they need to.

Ivanti Patch for Endpoint Manager

Swiftly detect vulnerabilities in Windows, macOS, Linux and hundreds of third-party apps and deploy expertly pre-tested patches everywhere you need them with a patch solution that can be deployed independently or as an add-on to Ivanti Endpoint Manager.

Key Benefits

- Simplify how you get things done with the ability to secure and manage from a single console.
- Establish and automate consistent policies for patching all your assets, even those that are mobile, remote or asleep.
- Detect and remediate OS and third-party app vulnerabilities on various systems, to comply with laws and regulations.
- Eliminate issues that slow user devices, and patch at the right time, under the right conditions, to minimize the impact on users.
- Available as a standalone solution or as part of Ivanti Endpoint Security for Endpoint Manager.

Ivanti Endpoint Security for Endpoint Manager

Gain the multi-layered security you need with a tool that combines powerful endpoint security management – media protection, isolated device remote control, security diagnostics, flexible dashboards and reporting, and more – with app control and automated patch management.

Key Benefits

- Gain insights about your environment, get help detecting security incidents and take swift action automatically – locking down users' endpoints is not your only option for defense.
- When you can't prevent malware attacks, you can quickly remediate those that do get through, protecting productivity.
- Stop unauthorized install and execution of unknown apps.
- Enforce usage policies for peripheral devices and ports, while providing data encryption for removable media.
- Collect and export data in all common formats, to tailor it to the needs of the auditor or compliance officer.
- Reduce your attack surface and improve your security posture quickly – get integrated security including patch management, security and AV content, device control/isolation, application control and reports all in one management portal.

About Ivanti

Ivanti breaks down barriers between IT and security so that Everywhere Work can thrive. Ivanti has created the first purpose-built technology platform for CIOs and CISOs – giving IT and security teams comprehensive software solutions that scale with their organizations' needs to enable, secure and elevate employees' experiences. The Ivanti platform is powered by Ivanti Neurons - a cloud-scale, intelligent hyper automation layer that enables proactive healing, user-friendly security across the organization, and provides an employee experience that delights users. Over 40,000 customers, including 85 of the Fortune 100, have chosen Ivanti to meet challenges head-on with its end-to-end solutions. At Ivanti, we strive to create an environment where all perspectives are heard, respected and valued and are committed to a more sustainable future for our customers, partners, employees and the planet.
