

Unified Access Licensing

Your Next Step From VPN to ZTNA

Ivanti Unified Access Licensing (UAL) is a named user license model that bridges the gap between traditional VPNs and zero trust network access (ZTNA) through Ivanti Neurons for Secure Access and Ivanti Neurons for Zero Trust Access.

Ivanti UAL's included core licensing empowers administrators to deploy virtual VPN and ZTNA gateways wherever and whenever needed as a transitional next step towards a zero trust secure access model.

Transition to ZTNA with minimal disruption

Minimize business disruptions while transitioning to a zero trust model at their own pace without "ripping and replacing" current VPN gateways.

Unlimited virtual VPN and ZTNA gateways

Quickly and easily deploy virtual VPN and ZTNA gateways, whether in the cloud or data center. Since core licensing is included, administrators can easily size-to-need their gateways, and just as easily decommission temporary gateways.

Centralized, automated named user licensing

Avoid manual user licensing management on gateways or with an Ivanti License Server, as user licensing is completely automated within the Neurons platform with Ivanti UAL.

Single pane of glass gateway management

Provide complete gateway lifecycle management, full configuration management, User Entity Based Analytics (UEBA), user risk scoring and application discovery through Ivanti Neurons for Secure Access – included as part of Ivanti UAL.

No rip-and-replace for existing gateways

Existing customers can easily migrate their PSA deployments over to Ivanti UAL with no interruption to the network or end user behaviors.

About Ivanti

Ivanti makes the Everywhere Workplace possible. In the Everywhere Workplace, employees use myriad devices to access IT networks, applications and data to stay productive as they work from anywhere. The Ivanti automation platform connects the company's industry-leading unified endpoint management, zero trust security and enterprise service management solutions, providing a single pane of glass for enterprises to self-heal and self-secure devices, and self-service end users. More than 40,000 customers, including 96 of the Fortune 100, have chosen Ivanti to discover, manage, secure and service their IT assets from cloud to edge, and deliver excellent end user experiences for employees, wherever and however they work.
