

# Build a Path to Operational Excellence

Why build the future of supply chain mobility on the Velocity platform? Because operations start realizing results quickly, and the platform expands as new use cases emerge.

Customers are already witnessing impressive benefits, including:

Training times **reduced 66%**

Workers are trained on Velocity and voice-enabled apps in one day, not three<sup>1</sup>

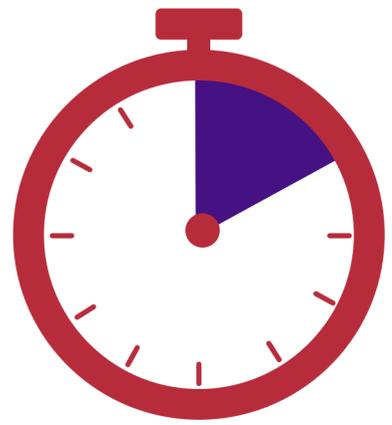

**24% faster** cycle time per pick

Workflow optimization eliminated 12 key presses, delivering faster task completion<sup>2</sup>

Saving **2 hours** each day

Eliminating 12-seconds from each pick enables fulfillment to meet customer expectations faster<sup>3</sup>

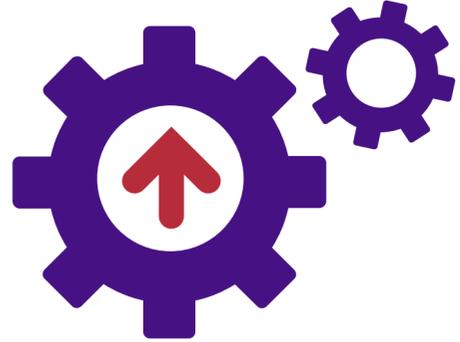

Picking errors **reduced by 40%**

Incorporating images of goods gives workers visual confirmation of items to be picked<sup>4</sup>

**15% productivity boost**

Optimized Android experience without changes to the existing WMS, with a voice-directed future<sup>5</sup>

## Start optimizing workflows

The Velocity platform accelerates the journey to operational excellence; providing the foundation for the future of supply chain mobility. Velocity delivers efficiencies that speed up tasks, incorporating tools that help attract and retain supply chain talent, so more work is accomplished each shift.
