# It's Time to **Take Mobile Security More Seriously**

**ivanti**

Enterprise mobility is a dynamic threat vector, and increasingly a favorite way for bad actors to introduce ransomware and other attacks. You've got to elevate your defenses to protect your mobile ecosystem.
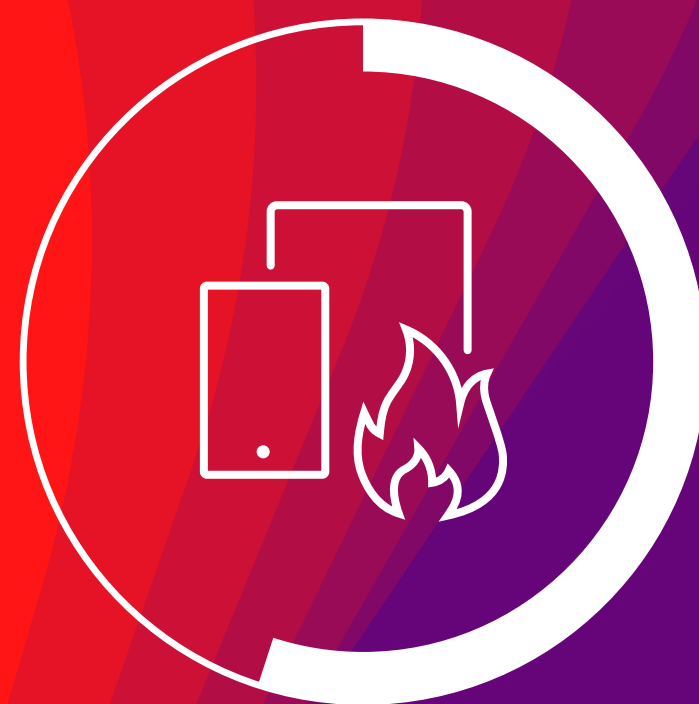

## 62%
of authentications to corporate networks come from mobile and non-traditional operating systems – a new high.*

## 25%
25% of mobile users tapped on at least one phishing link every quarter in 2023.*

## 53%
53% of survey respondents experienced an organizational security incident involving a mobile or IoT device that resulted in data loss or downtime.*

In a mobile-first world, it is essential to strengthen prevention and minimize the time to find and remediate exposures. Let us show you how, with **Ivanti Mobile Threat Defense.**
