

Securing mobile endpoints for the warfighter's mission

Ivanti Endpoint Manager Mobile for the Department of War and Intelligence Community

Challenge

Mission success depends on secure, available and policy-compliant mobile access across all environments. As mobile devices have become integral to defense operations, agencies require a solution that supports Zero Trust architecture, aligns with the Department of War (DoW) policy and works in on-premises and air-gapped environments.

Ivanti Endpoint Manager Mobile enables mission-focused organizations, including the DoW and the Intelligence Community (IC), to secure and manage mobile endpoints at scale. Engineered for operational flexibility and compliance, Endpoint Manager Mobile supports a broad range of devices — including iOS and Android — with the ability to operate within disconnected and classified networks.

Multi-tenant and STIG-ready endpoint control

Ivanti Endpoint Manager Mobile provides a centralized platform for managing mobility across DoW branches and mission-specific units, delivering multi-tenancy with separation of policy, data and administrative control. This enables Department of the Army components and other defense entities to operate independently while benefiting from unified infrastructure.

Ivanti Endpoint Manager Mobile provides compliance with DISA Security Technical Implementation Guides (STIGs) for iOS and Android, with configurable controls that meet baseline requirements. Built-in AI-powered mobile threat defense (MTD) capabilities proactively identify mobile security risks and enforce policy compliance.

Key capabilities

- Multi-tenancy support for the Department of the Army and other DoW components
- STIG compliance enforcement for Android, iOS, Windows and MacOS
- Native experiences across Apple and Android platforms from provisioning to end of life
- Integrations to streamline deployment of PKI, VPNs, Wi-Fi and OS provisioning
- Integrated Enterprise App Store for centralized management across enterprise and tactical environments
- Device posture monitoring and threat detection through integrated, AI-enabled MTD
- Certified with FIPS-validated cryptographic libraries, NIAP Common Criteria and Commercial Solutions for Classified (CSfC)

Built for air-gapped and on-premises environments

Ivanti Endpoint Manager Mobile was designed to function in low-connectivity or classified environments that lack internet access. It can be deployed in disconnected, air-gapped or on-premises networks while providing full mobile device lifecycle management.

The platform delivers end-to-end policy enforcement, secure app distribution, and auditing, even when operating in isolated or tactical deployments. It integrates with identity and access management (IAM) systems for Zero Trust architecture alignment while ensuring minimal latency and complete control.

Deployment benefits

- Operates fully in disconnected/air-gapped classified networks, cloud, or hybrid networks.
- Secure device provisioning and attestation in denied environments.
- Full support for government-furnished, mission-specific or bring-your-own-device (BYOD) configurations.
- Continuous enforcement of mobility and security policies.
- Supports tactical, electronic flight bag (EFB), forward-deployed use cases.

Alignment with DoW Zero Trust Architecture and Department of the Army Unified Network Plan

Ivanti Endpoint Manager Mobile supports the Zero Trust Strategy and Roadmap by enforcing granular access control, continuous device health monitoring and secure app delivery. The solution integrates with existing IAM solutions to enable risk-based policy decisions and serves as a foundational component of mobile endpoint security in Zero Trust architectures.

It also aligns with the Department of the Army Unified Network Plan, providing endpoint visibility, control and orchestration that supports convergence across tactical and enterprise environments.

Policy compliance and alignment

- DoW Zero Trust strategy and roadmap
- DISA STIG and risk management framework requirements
- Department of the Army Unified Network modernization goals

Mission-aligned support and technical services

Ivanti provides dedicated, U.S.-based technical support tailored to the needs of DoW and IC

environments. Support services include pre-deployment readiness assessments, STIG configuration assistance and post-deployment operational support.

Support offerings

- U.S.-based technical account managers with proven experience in DoW deployments
- Direct access to engineering teams for mission-specific environments
- Documentation and training aligned with DoW acquisition and program office requirements

Delivering scalable, secure mobility for defense operations

Ivanti Endpoint Manager Mobile delivers the security, flexibility and operational continuity defense agencies require to manage mobile endpoints at scale without compromising on mission or compliance. Whether supporting day-to-day operations or classified missions, Ivanti Endpoint Manager Mobile helps federal organizations improve readiness and enforce policy across the mobile ecosystem.

About Ivanti

Ivanti is a global enterprise IT and security software company dedicated to unlocking human potential by managing, automating and protecting data and systems to empower continuous innovation. With adaptable software solutions tailored to customer needs, Ivanti empowers IT and security teams to enhance operational efficiency, cut costs and proactively mitigate security risks. At the heart of Ivanti's offerings is the AI-powered Ivanti Neurons platform, which transforms the way IT and security teams operate. By delivering unified, reusable services and tools, the platform helps ensure consistent visibility, scalability, and secure solution implementation, enabling teams to work smarter, not harder. Ivanti follows "Secure by Design" principles to provide software solutions that scale with our customers' needs to help enable IT and Security to improve operational efficiency while reducing costs and proactively reducing risk. Ivanti fosters an inclusive environment where diverse perspectives are honored and valued, reflecting a commitment to a sustainable future for customers, partners, employees and the planet. Learn more at www.ivanti.com and follow us on social media @GoIvanti.
