Zero-Day

Patch Tuesday has a few juicy surprises for us. One vulnerability being exploited in the wild affects both Internet Explorer and Windows, and two public disclosures will raise concerns with Internet Explorer and .Net Framework. We also have a Zero Day in Flash Player.

	Bulletins	CVE Count	Impact	Vendor Severity	Publicly Disclosed	Zero Day	Threat Risk	Notes
	MS16-051 Internet Explorer	5	Remote Code Execution	Critical				Exploited in Wild CVE-2016-0189, Publicly Disclosed CVE-2016-0188
	MS16-052 Edge	4	Remote Code Execution	Critical				
	MS16-053 Windows	2	Remote Code Execution	Critical				Exploited in Wild CVE-2016-0189
	MS16-054 Office, SharePoint	4	Remote Code Execution	Critical				
	MS16-055 Windows	5	Remote Code Execution	Critical				
	MS16-056 Windows	1	Remote Code Execution	Critical				
	MS16-057 Windows	1	Remote Code Execution	Critical				
	MS16-058 Windows	1	Remote Code Execution	Important				
	MS16-059 Windows	1	Remote Code Execution	Important				
	MS16-060 Windows	1	Elevation of Privilege	Important				
	MS16-061 Windows	1	Elevation of Privilege	Important				
	MS16-062 Windows	7	Elevation of Privilege	Important				
	MS16-064 Adobe Flash Player	24	Remote Code Execution	Critical				
	MS16-065 .Net Framework	1	Information Disclosure	Important				Publicly Disclosed CVE-2016-0149
	MS16-066 Windows	1	Security Feature Bypass	Important				
MS16-067 Windows	1	Information Disclosure	Important					
	APSA16-02 Flash Player	24	Code Execution	Critical				CVE-2016-4117 Exploited in Wild, APSB16-15 should release on the 12th.
	APSB16-14 Adobe Reader	82	Code Execution	Important
