At first glance March Patch Tuesday looks like a lamb, but this lamb might have the teeth of a lion. The standard lineup of updates resolved 57 CVEs across the Windows OS, Office, .Net and Visual Studio, with a couple of Azure component updates in the mix. A Google Chrome update lead into Patch Tuesday (March 10 update), and Adobe released seven updates including Adobe Acrobat and Acrobat Reader.

Now let's talk teeth. There are 6 known exploited CVEs in the Windows OS and 1 exploit in Chrome on Mac this month.
