October is Cybersecurity Awareness Month! What better way to stay cyber-aware than to read up on the latest security updates hitting the market. Microsoft released updates for Windows, Office, .Net and several Azure services resolving a total of 117 new CVEs. There are two Zero-Day Exploits both of which have also been publicly disclosed. In addition, there are three more CVEs that have been publicly disclosed, but no reports of exploitation.

Additional security updates from Google and Zoom released, but the top priority will be the Windows OS update this month which addresses both zero-day exploits that Microsoft resolved.
